

## **About us: futronic sets global standards**

futronic is one of the world's leading providers of complex automation solutions for plant and equipment manufacturers in the glassmaking industry. We have also made a name for ourselves with innovative products and services for suppliers and producers in the industrial automation and other sectors.

## **High quality automation solutions**

Our company's core competencies are in the fields of control technology, drive components and programmable controllers (PLC). As a system supplier, futronic delivers an end-to-end approach, from concept development right up to commissioning of high quality automation solutions. Development, programming, production, testing and the final acceptance are all taken care of by futronic under one roof. Thanks to our short lines of communication and continuous support, our project teams are in a position to respond fast and flexibly to specific customer requirements, which they implement in a timely manner.

## **Systematic development of new markets**

The company has grown considerably in recent years: a team of around 90 staff currently support some 1000 installations worldwide in the glass producing industry alone. And in the future, too, we intend to keep on making a big impact with innovative products and services tailored to the challenges of glass manufacturing and industrial automation. We will continue to grow our business by systematically strengthening our position in new markets. futronic was established in 1972 and is today a Jetter AG company. Its Managing Directors are Michael Preuss and Christian Benz.
